

WATER PRODUCT CATALOGUE

About Us

Our company started in the 1970's with an idea of preserving the environment for the betterment of society. During that course of business, we pioneered the industry by supplying integrated fluid handling/water solutions. Now, with the trend of upstream industrialization and expanding urbanization in Indonesia, our portfolio of solutions has expanded into Fire Safety, Security, and Environmental systems. These solutions cover Water, Fire, and the Environment; elements that are deemed to be essential to human life.

Today, we are the leading company in Indonesia that offers innovative and modern solutions to meet your business needs and requirements. Through our distribution, engineering, and procurement and contracting services, we can be your one-stop-solution for pumps, rotating equipment, fire protection, safety, security, and environmental solutions.

To serve our customers throughout Indonesia; we operate our main head office, sales office, and workshop in Jakarta and its surrounding areas. Outside Jakarta, our branch offices and teams are available at Palembang, Surabaya, and Balikpapan. For flexibility and faster response to our customers' needs, we also work together with our dealer partners. Anytime, anywhere, there is no limitation in delivering our services across Indonesia.

Our Vision & Mission

"To create sustainable value for both our stakeholder and ourselves", and to be an innovative water, fire and environmental resources management company for the highest satisfaction and assurance of our stakeholders"

"for Generations to Come" We provide innovative and dependable solutions to manage water and fire resources, growing economies sustainably with the environment, in order to for society to live more prosperously from generation to generation.

Our Products & Services

One of our main business lines is to provide pump products, along with our principle **Ebara Corporation**. Ebara is a Japanese pump manufacturer established in 1912, with local manufacturing incorporated in Depok, Indonesia since 1980. As a distributor for Ebara pump products, we provide the following services:

Consultation

Giving advice for projects requiring pumps, from the technical selection of pumps for specific applications and options for price, performance, and reliability

Design

Preparing the proper designs of pumping installations/stations, including mechanical and electrical works.

Implementation

Creating a project implementation plan for the system suitable with the end user's specific needs.

Testing & Commissioning

Contracting the whole work, from supply, installation, testing and commissioning until handover. Ensuring installation methods compliance and proper running.

Supervision

Installation

After-Sales Service

Providing after sales services, proper spare parts availability, workshop, repair and engineering team that is on standby for future servicing needs
